## Color System

### RAL® Matching Guide\*

RAL®  
1004

=

Below are the closest matches of our Vanceva® interlayer system to the RAL® color system. Find the colored layering of Vanceva that best matches your RAL® color and go to [www.saflex.com/colorstudio](http://www.saflex.com/colorstudio) to order the sample. If we do not have a match please contact us. Laminate color is influenced by glass and lighting. This match may not be an exact color match. Before specifying a color based on this match, obtain a sample made with the actual glass to be used in your project.
